TAF 3 - Step by Step

Here we will shortly explain the relevant steps in working with TAF 3 in illustrated instructions. We will summarize thematically related areas in individual PDF files and offer them for download. We will follow our training courses in terms of content and sequence. You could consider this series as a „script“ for the trainings.

Parts 0 to 8 correspond to the „beginner training“, parts 9 to 14 are material from „advanced training“, which can be interesting for beginners as well. Especially part 10 (Timing Client) is recommended to everyone, because a lot of work can be saved by linking the timing to the competition office.

Currently the following parts are available in an English version here:

- Part 0: Install TAF on your computer
- Part 1: Creating a competition
- Part 2: Entries
- Part 3: Final preparations
- Part 4: Setting up the competition office / network
- Part 5: Preparing start lists
- Part 6: Data entry
- Part 7: Certificates
- Part 8: LA.portal
- Part 9: Usefull helpers
- Part 10: Timing client
- Part 11: Technical client
- Part 12: WebTEC 2
