

Info, tips, tricks and more on the Seltec GmbH athletics software.

Here we want to create an **expert system** for these programmes, with the help of which many problems can be avoided in advance or eliminated in acute cases.

We would like to explicitly invite you to actively participate here. We, as the developers, may be „blind“ to certain issues - and that is why our assistance differs at certain points from that of a „mere user“. Here you can share this different perspective with other users.

The wiki is **not** to be seen as a place where questions are asked and answers given but rather as a place where successful solutions to problems are collected. For direct and concrete questions the [Seltec User Forum](#) is the more appropriate place.

Due to the growing number of SPAM registrations, an activation for new users had to be implemented. This means that the user account must first be activated by the administrators.
